

KATADYN BASE CAMP PRO 10L - gravity filter with highest capacity

PRODUCT CHARACTERISTICS

Technology:	Gravity filter; 0.2 micron (0.0002 mm) Ultra Flow Filter™ pleated glassfiber
Effect:	Removes bacteria, cysts and sediment
Output:	Up to 2 l/min
Capacity:	Up to 1,500 l depending on water quality
Weight:	Approx. 350 g
Dimensions:	27 x 15 x 7 cm
Guarantee:	2 years
Material:	Silicone, glassfiber, resistant and solid food-grade plastics
Accessories:	10L water bag, Ultra Flow Filter™ Element, quick connects
Article No.:	8019296 Katadyn Base Camp Pro 10L
Optional:	8019256 Katadyn Camp Series Shower Adaptor 8019168 Katadyn Replacement Ultra Flow Filter 8013450 Carbon Cartridge Post Filter 8019168 Katadyn Base Camp Upgrade Kit 1120070 Katadyn Siphon Ceramic Microfilter

Series: Backcountry

FACTS

- Thanks to gravity water flows without pumping.
- At the heart of the Katadyn Base Camp Pro 10L is the newly developed Ultra Flow Filter™ Element. With its flow rate of up to 2 liters per minute it reliably filters bacteria, cysts and sediment.
- A cleanable filter protector lengthens the lifetime of the filter element so it can clean up to 1,500 liters of water.
- Thanks to the water level indicator window it is clearly visible when another trip to the water source is necessary.
- The outlet hose can be removed with a quick-release valve equipped with auto shut off. That keeps the hose from coming in contact with contaminated water during refilling.
- The practical carry strap makes fetching water from a river or spring easier.
- With the shower adaptor (available separately), nothing will stand in the way of a refreshing shower outdoors.
- One-Year AntiClog™ Guarantee on the filter element. Katadyn warrants your Ultra Flow Filter™ Element to be free from defects that cause the filter to clog.

PRODUCT CHARACTERISTICS > BENEFITS

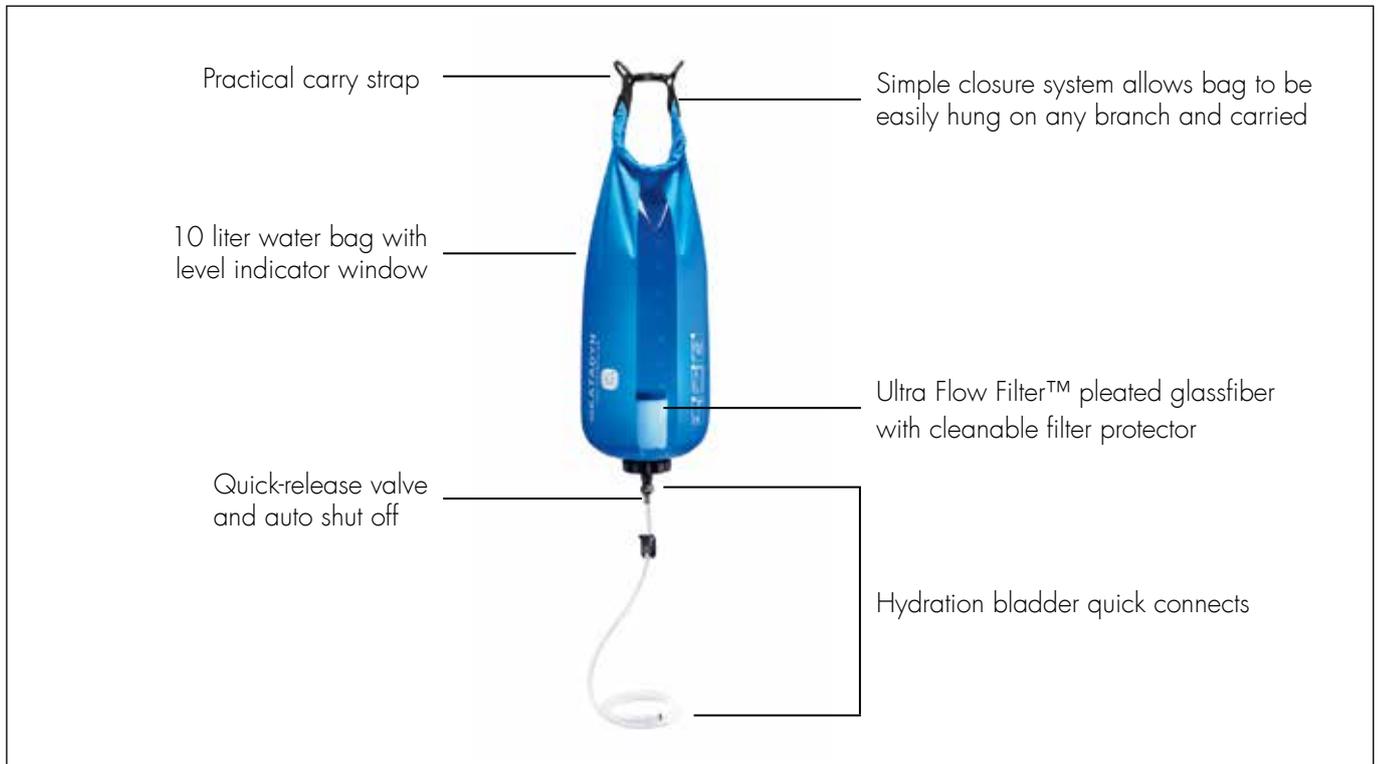

- High performance of up to 10 liters in 5 minutes > suited for larger groups
- Faster flow and reliability in all conditions
- Gravity filter > convenient filtering without pumping
- Compact filter, foldable water bag > minimum weight and space requirement
- Pleated glassfiber Ultra Flow Filter™ Element
- Suited for turbid conditions

SHORT PROFILE

Gravity filter with high water performance and volume. For 1 to 10 people. Ideal for families, camps, expeditions, tour operators, scouts or armies.

GRAVITY FILTRATION

Pumping is not necessary with gravity filtration. This means valuable time is free for other activities such as cooking or setting up tents. The performance of the filter depends on the difference in height between the filter and container. The filtered water is retained in a separate canister, bottle or water bag.

Tip:

The opening of the canister, bottle or bag for the filtered water should be as small as possible to prevent dirt from getting in.

Recommendation:

If the water is not to be used on the same day, use Micropur to preserve the water (preservation for up to six months).

Katadyn reserves the right to modify product characteristics
